EDUCATION

Christ University

Master of Technology in Computer Science; CGPA: Ongoing

Bangalore, Karnataka

July 2025 – May 2027

Vellore Institute of Technology

Bachelor of Technology in Computer Science and Engineering; CGPA: 7.9/10

Bhopal, Madhya Pradesh

August 2021 – June 2025

EXPERIENCE

Project Intern

National Atmospheric Research Laboratory (NARL-ISRO)

April 2025 – July 2025

Tirupati, Andhra Pradesh

- Built AI/ML models for magnetospheric energy analysis and solar wind coupling using Python, TensorFlow, and Scikit-learn, processing OMNI2 solar wind datasets with 10+ geophysical parameters
- Engineered 2D TEC mapping system using GNSS ionospheric data with spatial interpolation algorithms for space weather prediction and operational forecasting applications
- Collaborated with research scientists on space weather dynamics analysis, contributing to technical documentation and research publications for ISRO's forecasting systems

Machine Learning Intern

Unified Mentor

February 2025 – April 2025

Remote

- Designed end-to-end ML pipeline for vehicle price prediction achieving 92% accuracy using ensemble methods (Random Forest, XGBoost) with comprehensive feature engineering and data preprocessing
- Implemented real-time ASL detection system using CNNs with TensorFlow and OpenCV, achieving 95% classification accuracy across 26 gesture classes with optimized inference at 30 FPS
- Created heart disease prediction model with 88% precision using classification algorithms, implementing SMOTE for imbalanced data handling and ROC-AUC analysis for evaluation

TECHNICAL SKILLS

Programming Languages: Python, C++, JavaScript, HTML, CSS, SQL

Machine Learning & AI: TensorFlow, PyTorch, Scikit-learn, Keras, Computer Vision, NLP, Deep Learning

Data Science & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Data Preprocessing, Feature Engineering

Geospatial Technologies: QGIS, GIS, Geospatial Analysis, Remote Sensing, Geodata Processing

Databases: MySQL, MongoDB, Oracle 10g XE, Database Design, Query Optimization

Tools & Frameworks: Git, Docker, Jupyter, Cloud Computing (AWS/GCP basics), Linux/Unix

Core Competencies: Data Structures & Algorithms, System Design, Problem Solving, Agile Methodologies

PROJECTS

Geosynta - Geospatial Data Analysis Platform | Python, Pandas, Matplotlib, GIS

2025

- Constructed geospatial analysis toolkit implementing K-means clustering and DBSCAN for spatial pattern recognition, creating interactive GIS visualizations processing 100K+ geographic coordinates

American Sign Language Detection System | TensorFlow, OpenCV, Deep Learning

2025

- Architected real-time hand gesture recognition using custom CNN with 95% accuracy and 30 FPS performance, implementing data augmentation and model quantization for optimization

Facial Reconstruction from CCTV Footage | Computer Vision, Image Processing, OpenCV

2024

- Deployed super-resolution GAN algorithms enhancing surveillance footage by 4x, improving facial recognition accuracy from 65% to 89% using advanced image processing techniques

CERTIFICATIONS

AI/ML for Geodata Analysis – ISRO-IIRS | **Cloud Computing (Elite)** – NPTEL | **Applied ML in Python** – Coursera (UMich) | **Advanced SWE Simulation** – Walmart USA

ACHIEVEMENTS & LEADERSHIP

Selected for competitive ISRO research internship at NARL contributing to space weather forecasting | Solved 200+ DSA problems on LeetCode, GFG, Code360 | 7.9 CGPA with active research and industry projects
